APPROPRIATE DESIGN

QUALITY CONTROL

PRECISION ASSEMBLY

CUSTOMER CARE

Designed by international team of experts

We are dedicated to combating infant morbidity and mortality. We have cultivated an excellent network of medical experts in Vietnam and globally who are closely involved in our device development process to ensure the applicability of our devices to neonatal care in all environments.

Dolphin

CPAP

Next generation bubble CPAP that combines the latest technology in respiratory care and patient monitoring with exceptional value.

- all parts washable and reusable
- own air source with electronic blender
- build-in pulse oximeter by Masimo
- 3h battery backup (no heat or humidity)

Firefly

phototherapy

Award winning double sided phototherapy device designed for ease, effectiveness and precise treatment of neonatal jaundice.

- low running costs
- long lifetime - up to 44,000 hours
- compact size
- 3h battery back up (optional)

Colibri

phototherapy

High power LED phototherapy delivering blue light at optimal range and maximum skin coverage for faster jaundice treatment.

- low running costs
- long lifetime - up to 44,000 hours
- compatible with radiant warmers and incubators
- 3h battery back up (optional)

Wallaby

Warmer

Efficient, comfortable device to prevent and treat hypothermia with remote temp. and object sensing for additional control and safety.

- angle adjusted bed (up to 12 degrees)
- adjustable overhead unit (horizontal)
- x-ray tray
- LED procedure light and LCD touch screen
- 3h battery backup (light and monitoring only)

Beluga

resuscitator

Easy-to-use T-piece resuscitator suitable for emergencies and delivery units

- integrated blender
- build in 4h battery
- Portable and usable in horizontal or vertical position
- easy-to-use touch screen

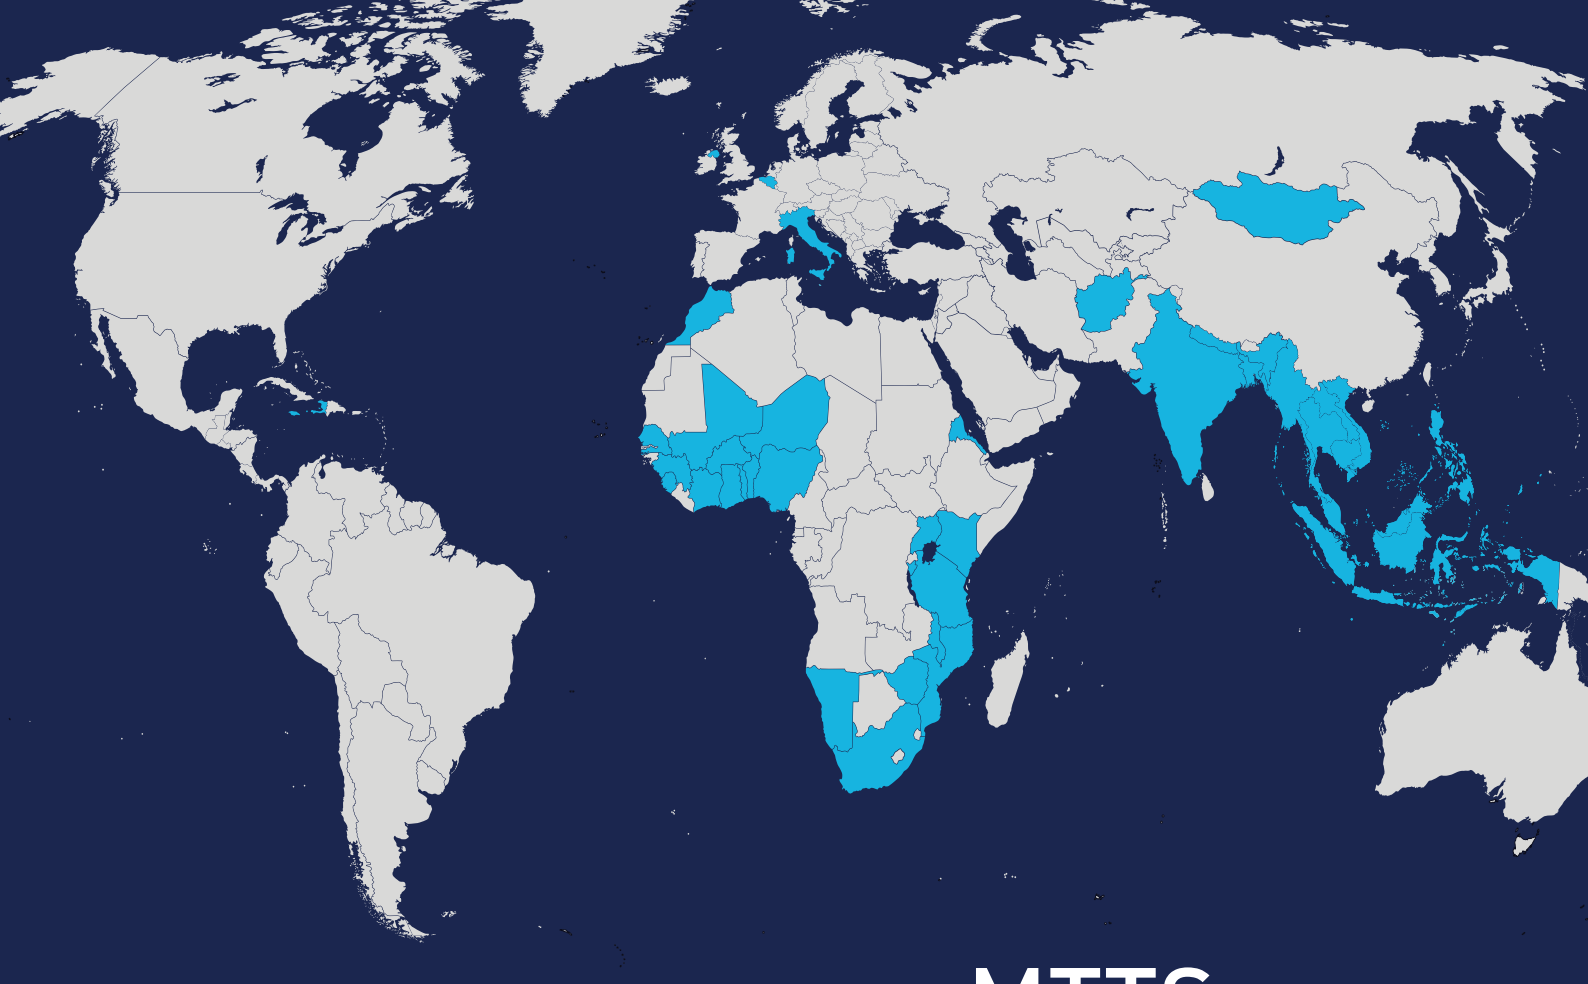

Impala

ventilator

Compact ventilator suitable for ambulances and intensive care wards

- integrated blender and FiO₂ monitoring
- build in 4h battery
- ACV, SIMV and CPAP modes
- controlled target PIP and consistent PEEP

MTTS DELIVERS **INNOVATIVE, COST-EFFECTIVE SOLUTIONS FOR NEWBORNS** IN NEED OF **INTENSIVE MEDICAL CARE.**

- 1,100,000 patients
- 6,500 devices
- 45 countries
- 600 hospitals
